

### GHG

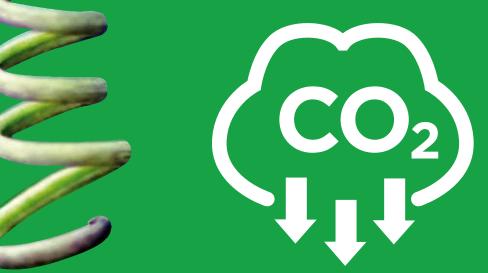

Liberty Spring has implemented indicators to **measure and reduce its carbon footprint**. More specifically **greenhouse gas (GHG)** emissions. The company continues its many efforts to achieve its objectives.

"As a responsible corporate citizen, Liberty Spring has implemented standards for managing environmental aspects."

- Development of lighter springs aimed at reducing fossil fuel and/or energy consumption.
- Reduction in the transport of products minimizing the use of trucks, planes and boats.
- S Conversion of the main plant ovens to natural gas.

# ROHS + REACH

#### **ROHS**

ROHS is a European directive on the restriction of the use of certain hazardous substances. This European legislation limits the levels of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE) present in electrical and electronic equipment sold in the European Union, since July 1, 2011.

#### **REACH**

REACH is a regulation on the registration, evaluation, authorization and restriction of chemicals. With reference to European Union Regulation No. 1907/2006, the objective of REACH is to ensure a high level of protection of human health and the environment against the risks that may be posed by chemicals.

"All Liberty Spring products comply with these regulations."

### ISO 14001

• ISO 14001: Standard developed by ISO for organizations concerned with **improving the safety of their employees**, reducing risks in the workplace and **creating better and safer working conditions**.

The ISO 14001 standard allows the implementation of indicators and an action plan to **reduce the volume of waste and hazardous waste**. It also makes it possible to measure greenhouse gas emissions related to the combustion of natural gas. In addition, this standard **reduces electricity consumption**.

• **INRP Standard:** We are working to make an inventory of contaminant emissions into the atmosphere and pollutant releases.

## Remote work

Our remote work policy aims to reduce car travel by employees in order to **reduce greenhouse gas** (GHG) emissions.

This policy aims to reduce traffic in urban areas and travel over long distances.

We reduce our carbon footprint by **reducing our** CO<sub>2</sub> emissions.
